

Borehole Packer

BOREHOLE INSTRUMENTATION

FEATURES

- Operates at high pressures
- Suitable for hydraulic fracturing
- Suitable for making impressions
- Used in small low cost E size holes 38mm diameter
- Larger sizes are available on request
- Dual hydraulic lines
- Robust and reliable

APPLICATIONS

- Stress determination for mining & civil applications
- Tunneling and underground excavation industry
- Coal mining and petroleum industry
- Grout Packers available

TOOL

TECHNICAL SPECIFICATIONS

| | FRACTURING TOOL | IMPRESSION PACKER |
|-----------------------------|------------------------------|------------------------------|
| Diameter of collar: | 36mm * | 36mm * |
| Diameter of packer: | 36mm * | 34mm * |
| Overall Length: | 620mm | 620mm |
| Active Length: | | 500mm |
| Test Section Length: | 160 mm | |
| Weight: | 2.4kg | 2.4kg |
| Max packer pressure: | Typically greater than 35MPa | Typically greater than 20MPa |
| Diameter (wrapped) | | 37mm |

* Larger sizes available
