### applications

- analysis and processing software for HI Cell data

### features

- installed on a PC's hard drive running any Microsoft operating system including XP professional
- add in program & operates using Microsoft excel
- latest 2003 version
- calculates absolute rock stresses or rock stress changes for data obtained from CSIRO Hollow Inclusion Cells
- new user friendly tool bar used to convert, calculate and generate data plots
- overcoring & biaxial conversions
- calculate stress magnitude & direction
- rock property calculations
